

MockGenie User Guide

This guide explains how to use MockGenie after activating the plugin in WordPress.

1. Accessing MockGenie

1. After activating the MockGenie plugin, go to the WordPress admin menu.
2. Navigate to Tools -> MockGenie.

This is the main interface where you will register, generate images, and manage your account.

2. User Registration

1. On the MockGenie page, click Create Account.
2. Enter your email address in the registration form.
3. Click Submit.

After submitting, an email will be sent to your address containing your username and password.

3. Logging In

1. Open the email you received from MockGenie.
2. Copy your username and password.
3. Go back to the MockGenie login page.
4. Enter your credentials and click Login.

4. Generating Images

1. After logging in, navigate to Upload -> Generate with MockGenie.
2. You will see a field to enter your prompt.
 - Example: "A futuristic city at sunset in watercolor style."
3. Enter your prompt and click Generate Image.

5. Managing Generated Images

MockGenie User Guide

Once the image is generated, you have the following options:

- Save Image - Saves the generated image to your Media Library.
- Regenerate - Generates a new image using the same prompt.
- Cancel - Cancels the current generation process.

6. Notes & Tips

- Ensure your API key is configured in the plugin settings.
- Usage limits may apply depending on your plan.
- For best results, provide detailed prompts.
- Generated images are automatically saved to your Media Library if you click Save.
